PROJECTS

Sorting Visualizer

[Sorting Visualizer Link](#)

- Developed a Sorting Visualizer using HTML, CSS, and JavaScript to simplify sorting algorithm understanding.
- It's an interactive platform which does observe step-by-step sorting processes in real-time.
- Promoted intuitive learning of sorting algorithms through visual representations.

MyLibrary

- This project efficiently manages authors and books using Node.js, Express.js, and MongoDB.
- Intuitive user interface with HTML and CSS for seamless navigation and interaction.
- Facilitates unrestricted author addition and offers editing capabilities for both books and authors.

Placement Preparation Tracker Website

- Developed using HTML, CSS, Bootstrap, Node.js, Express.js and MongoDB, ensuring an interactive user experience.
- Live "Placement Preparation Tracker" website with personalized learning paths for DSA, Web Development, and Core subjects like DBMS, OOPs, Operating System, Computer Networks, Software Engineering. Valuable resource for placement preparation, offering clear paths to enhance efficiency.
